# Conclusions and Future Work

---

## Extraction and Preparation of the dataset:

- Gathering data from different sources;
- Cleaning the data;
- Add information to the dataset;
- Analyze the final dataset.

## Future work:

Develop a **search engine** to obtain data from the dataset:

- Search most popular movies in a certain platform;
- Search for movies from a specific year;
- Search the most popular/highest rated movies from a certain genre;
- Search movies from a certain actor.
